

Work pants

The Holster Pocket work pants from Skillers are designed for tradespeople including electricians, plumbers and construction tradespeople.

The pants are made from a hard wearing and lightweight cotton/polyester fabric and are designed to be both practical and for all-day comfort.

The pants feature top-loading knee pad pockets that lock the Skillers line of removable lightweight and anatomical knee pads in place.

Double-sided tough velcro tool fasteners on each side of the pants are designed for detachable holster pockets, pouches and hammer holders. They are available in blue, grey and black.

An alternate version of the pants is available for electricians, using 100% cotton fabric to provide more suitable protection for the electrical trades.

These pants include all of the features of the standard version.
