Tool vest

The Skillers 12-pocket tool vest is designed for professional tradespeople, claimed to eliminate the stress and strain of carrying tools associated with traditional belts and harnesses, while putting all tools within easy reach to accomplish the task at hand.

Attached holster pockets keep often-used tools conveniently and safely close by for easy access.

The vest is available in three different fabrics to suit a wide variety of trades and situations including lightweight 35% cotton 65% polyester fabric, heavy-duty 65% cotton 35% polyester fabric and 100% cotton expressly designed for electricians.

The vest is available in several colours depending on fabric type, including black, navy, grey and khaki.
