

NEW SWEDISH RANGE OF WORKWEAR BEGS THE QUESTION: ISN'T IT ABOUT TIME?

From Sweden comes a new range of construction clothing billed as a flexible system of integrated workwear to meet the comfort, style and functional needs of today's skilled professional tradesman.

The Skillers range – which includes shorts, pants, tool carrying accessories and a very clever tool vest – brings construction clothing into the 21st century and will appeal to professional electricians, plumbers, carpenters, construction and building tradesmen, landscapers indeed anybody looking for workwear that is high quality, comfortable, practical and with good looking European style.

Made from a hard wearing cotton/polyester lightweight fabric that is very comfortable, Skillers shorts and workpants are designed with a host of unique features that are practical and designed for all-day comfort.

Features such as kneepad pockets that lock the removable kneepads in place and anticipate your every lateral move and Velcro tool fasteners for Skillers detachable holster pockets, pouches and hammer holders.

In conjunction with its range of construction clothing, Skillers is Europe's leading manufacturer of products designed to literally take the strain off personally carrying tools and equipment on the job, all day long.

Skillers Flexi-System is an innovative system of tool attachments and padded shoulder harness designed to spread the weight of tools and equipment evenly – unlike today's tool belts which transfer all the weight to your hips and lower-back leading to fatigue, increased risk of accident and back injuries.

Flexi-System allows tradesmen to customise their workwear to suit their individual particular needs with pouches and holders for a wide range of tools and equipment.

The company's signature products include:

- Skillers basic lightweight, long lasting comfortable pants with top loading kneepad pockets
- Skillers Holster Pocket Work Pants for tools and top-loading kneepad pockets for Skillers line of patented, lightweight, anatomical kneepads
- Skillers 12 Pocket Tool Vest eliminates the stress and strain of traditional belts and harnesses and puts all tools within easy reach to accomplish the task at hand

Skillers Flexi-System enables tradies to customise work wear with a belt, yoke, harness, suspenders and several pouches that evenly spreads the weight of tools and equipment

Check out the Skillers range and live product demonstrations at www.proskill.com.au. You can order on-line and find your nearest stockist. Sales and distribution enquiries welcome – call Dennaë at Proskill Australia 1300 722 797 or email, enquiries@proskill.com.au.
