

Our team will look the goods

WHEN the Aussie WorldSkills team heads overseas to compete, they will be looking the goods in some of the world's top work gear.

The Skillers range from Sweden is billed as a flexible system of integrated workwear to meet the comfort, style and functional needs of today's skilled professional tradesman.

Skillers claim their clothing brings construction clothing into the 21st century and will appeal to all tradespeople. It's touted as high quality, comfortable, practical and with good looking European style.

Made from a hard wearing cotton/polyester lightweight fabric, Skillers shorts and workpants are designed with a host of unique features that are practical and designed for all-day comfort.

Features such as kneepad pockets that lock the removable kneepads in place and anticipate your every lateral move and Velcro tool fasteners for Skillers detachable holster pockets, pouches and hammer holders.

Also in the Skillers range is their Flexi-System: a patented and innovative system of tool attachments, yoke, and shoulder harness designed to spread the weight of tools and equipment evenly.

Flexi-System allows tradesmen to customise their workwear to suit their individual particular needs with pouches and holders for a wide range of tools and equipment.
