

NEW RANGE OF CONSTRUCTION WORKWEAR FROM SWEDEN

Billed as an innovative, flexible range of integrated workwear to meet comfort, style and functional needs of today's professional tradesmen, Skillers range direct from Sweden brings construction workwear into the 21st century.

The Skillers range includes shorts, pants, tool carrying accessories and a very clever tool vest for practical appeal to professional electricians, plumbers, carpenters, construction workers, building tradesmen and landscaper gardeners. Indeed anyone looking for workwear that is high quality, comfortable, practical and modern.

Made from a hard wearing cotton/ polyester lightweight fabric that is very comfortable, Skillers shorts and workpants are designed to host unique features that are practical and comfortable.

Some of the workwear features include removable, lockable kneepad pockets, Velcro tool fasteners, detachable holster pockets, pouches and hammer holders.

In conjunction with its range of construction clothing, Skillers is Europe's leading manufacturer of products designed to literally take the strain off trades people carrying tools and equipment on the job, all day long.

Skillers Flexi-System is an innovative system of tool attachments and padded shoulder harness designed to spread the weight of tools and equipment evenly.

Unlike today's tool belts which transfer all the weight to your hips and lower-back leading to fatigue, increased risk of accident and back injuries.

27 Skilleroos represented Australia in the Worldskills International Competition in Japan to demonstrate their skills competing against 48 countries to an audience of over 200,000 people. The Australian team won and performed extremely well wearing the Skillers gear in the Helsinki competition in 2005 and again in Japan in 2007 coming fifth overall in the World.

Skillers Workwear & Flexi System allows tradesmen to customise their workwear with a wide range of accessible pouches for tools and equipment.

For Skillers Workwear & Flexi System demonstrations visit the website www.proskill.com.au or see the advertisement on page 2.
